

ACTIVE DATA MANAGEMENT PLANS

Machine-actionable • Reusable • Evolutive

THE CHALLENGE

- Data and software are key research outputs
- Traditional Data Management Plans (DMP) are static and rarely reused
- Concise actionable plans help tracking data management during and beyond projects

DMP OPIDoR

An application to create machine-actionable Data Management Plans (maDMP) with dedicated support for data as well as software and code management

BENEFITS

- Machine-actionable DMP (FAIR compliant)
- Software & code management included
- Easy export & sharing (JSON, API, PDF)
- Integration with research workflows
- Compliance with community best practices and funder requirements

WHY IT MATTERS

- Reduce the burden on researchers
- Boost transparency & reproducibility
- Improve collaboration
- Ensure long-term reuse of data & software
